1.0 INTRODUCTION

The Substance Abuse and Mental Health Services Administration (SAMHSA) is the agency within the U.S. Department of Health and Human Services that leads public health efforts to advance the behavioral health of the nation. SAMHSA's mission is to reduce the impact of substance use and mental illness on America's communities.

1.1 PURPOSE

The purpose of this document is to provide instructions to the approved user on how to use FindTreatment.gov API.

2.0 RESOURCE 1: SAMPLE URLS

Below is a sample URL:

URL: https://{host}/locator/exportsAsJson/v2[?querystring]

Additionally, below is a table of sample URL searches and a description of each URL.

Table 1. Example JSON Queries and Description

No.	Ex. JSON Query String	Description
1	https://findtreatment.gov/locator/exportsAsJson/v2?sAddr=%2239.141375,-77.203552%22&limitType=0&limitValue=18	Searches the first page of facilities in the state of Maryland with a starting address of (latitude, longitude) "39.141375,-77.203552."
2	https://findtreatment.gov/locator/exportsAsJson/v2?sAddr=%2739.141375,-77.203552%27&limitType=1&limitValue=1119	Searches the first page of facilities in Montgomery County, Maryland, with a starting address of (latitude, longitude) "39.141375,-77.203552."
3	https://findtreatment.gov/locator/exportsAsJson/v2?sAddr=%2739.141375,-77.203552%27&limitType=2&limitValue=20000	Searches the first page of facilities within a distance of 20,000 meters (12.43 miles) from the starting address of (latitude, longitude) "39.141375,-77.203552."
4	https://findtreatment.gov/locator/exportsAsJson/v2?sAddr=%2739.141375,-77.203552%27&limitType=1&limitValue=1119&filterFPhone=240	Searches the first page of facilities in Montgomery County, Maryland, with a starting address of (latitude, longitude) "39.141375,-77.203552" and phone number containing "240."
5	https://findtreatment.gov/locator/exportsAsJson/v2?sCodes=OTP,BU,NU,DM&sAddr=39.0839994,-77.15278130000002&limitType=2&limitValue=80467.2&pageSize=100&page=1&sort=0	Searches the first page of facilities within a distance of 8,0467 meters (50 miles) from the starting address of (latitude, longitude) "39.0839994,-77.15278130000002" with services OTP (SAMHSA-certified opioid treatment program), BU (buprenorphine used in treatment), NU (naltrexone used in treatment), and DM (methadone detoxification).
6	https://findtreatment.gov/locator/exportsAsJson/v2?sCodes=OTP,BU,NU,DM&sAddr=39.0839994,-77.15278130000002&limitType=2&limitValue=80467.2&pageSize=100&page=1&sort=0	Searches the first page of facilities within a distance of 8,0467 meters (50 miles) from the starting address (latitude, longitude) "39.0839994,-77.15278130000002" with services OTP (SAMHSA-certified opioid treatment program), BU (buprenorphine used in treatment), NU (Naltrexone used in Treatment), DM (methadone detoxification).

Response content type: **JSON**

APPENDIX A. DESCRIPTION OF JSON PARAMETERS

Table 2. Description of JSON Parameters

Parameter	Value format	Example value	Description
sAddr	"{*lng*},{*lat*}" or '{*lng*},{*lat*}' where -{*lng*} is a placeholder for the longitude coordinate as decimal number. A positive number indicates a position east of the Greenwich Prime Meridian, but a negative value indicates a position to its west. -{*lat*}is a placeholder for the latitude coordinate as decimal number. A positive number indicate a position north of the equator, while a negative value indicates a position south of the equator. The value is enclosed within a pair of double quotes or within a pair of single quotes. Coordinates are separated by a comma.	"-77.2190821,38.9224746" '-77.2190821,38.9224746' Each of the above example values means 77.2190821 degrees longitude west and 38.9224746 degrees latitude north.	Specifies starting location from which to conduct a geography-based search. Options for such a search are state, county, and distance.
limitType	One of the following values: {0, 1, 2}	0 (denotes state search) 1 (denotes county search) 2 (denotes distance search)	Specifies the type of geography-based search. Use 0 for state-based search, 1 for county-based search, or 2 for distance-based search. Context is based on sAddr parameter.
limitValue	Numeric string	10 (example state ID) Refer to the state ID table, which is different from the FIPS code in the appendix. 1119 (example county ID) Refer to county ID in the attached Excel file. 160934.4 (example distance in meters)	Value's meaning is associated with limitType parameter. If limitType parameter is 0 for state-based search, then limitValue parameter is interpreted as state ID in the table. If limitType parameter is 1 for county-based search, then limitValue parameter is interpreted as county ID in the Excel attached file. If limitType parameter is 2 for distance-based search, then limitValue parameter is interpreted as distance in meters.
sType	One of the values in the following set: {sa,mh,both} Enclosing the value within a pair	sa "sa" 'sa'	Specifies the service type to search on. If sType parameter is *sa*, then search is limited to substance use facilities. If

Parameter	Value format	Example value	Description
	of single quotes or within a pair of double quotes is optional. The service does not differentiate letter case, i.e., it is case insensitive. Upper case, lower case, or mixed case letters are allowed.	All the above example values are interpreted as having same meaning.	sType parameter is *mh*, then search is limited to mental health facilities. If sType parameter is *both*, then search encompasses both substance use facilities and mental health facilities. If the sType is not specified, it searches for *sa*, *mh*, and *otp*.
sCodes	Comma separated string of abbreviated service codes: sCodes=xx,xx,xx	sCodes=SA,OP,HIT List facilities that provide all of the following services: "substance use treatment", "outpatient", and "hospital inpatient treatment".	Specifies the service codes of the services that are provided by the facility. The service codes can be downloaded via findtreatment.gov
stateCode	stateCode=xx	stateCode=MD	Specifies the state code for the facility, the using state abbreviation. This parameter can be in combination with limitType=2 to search for facilities in a state within a given radius distance.
sort	Numeric string (integer value)	0 (default): sort by nearest distance 1: reverse of default 2: sort by name1 3: sort by name2	Specifies index of attribute by which sorting should be applied. Attribute indices start at 1. The attributes are those of each JSON object in results.
filterFName	Arbitrary string	John Doe Rehab Center	Specifies search string to use for filtering, such that results are limited to only facilities with a name that contains the search string. Matching facilities will have a name that exactly matches the search string or that includes the search string within the name.
filterFAddress	Arbitrary string	123 Main Street	Specifies the search string to use for filtering, such that results contain only facilities with an address (line 1 only) that contains the search string. Matching facilities will have an address that exactly matches the search string or that includes the

Parameter	Value format	Example value	Description
			search string within the line 1 part of the address.
filterFPhone	Arbitrary string	123-4567	Specifies the search string to use for filtering, such that results contain only facilities with a phone number that contains the search string. Matching facilities will have a phone number that exactly matches the search string, or that includes the search string within the phone number.
page	Numeric string (integer value)	Default: 1 2	Specifies which page of results to return from paginated complete results. Page indexing starts at 1.
pageSize	Numeric string (integer value)	Default: 30 20	Specifies number of results to include per page for paginated results. Maximum limit for pageSize is 2000.
cut	Fixed string: NIAAA	cut=NIAAA	This parameter will override sType; it includes only "substance use" programs and excludes the two services listed under the *exclusive services* category ("DU", "DUO").

APPENDIX B. STATE ID TABLE
